PROFESSIONAL SUMMARY

Customer Operations and Technical Support leader with 6+ years building L2 support functions and 24/7 operations infrastructure across iGaming and FinTech. Scaled a 24/7 operations organization from 6 to 30 FTE at eToro across NOC, SOC, and Professional Services. Cut MTTA 93% and held SLA adherence at 99.98% across high-traffic trading and betting environments. Operator-side experience across both regulated FinTech and licensed iGaming jurisdictions.

KEY ACHIEVEMENTS

- Built the L2 application support function from zero at Setanta Sports. Cut escalation rate from 65% to 3% in 12 months.
- Scaled a 24/7 operations organization from 6 to 30 FTE at eToro across NOC, SOC, and Professional Services.
- Cut MTTA 93% (17.3 to 1.2 minutes) and held SLA adherence at 99.98% across a global FinTech trading platform.
- Founded Georgia's first SOC bootcamp. Converted cohort graduates into full-time eToro security operations hires.

Service Management: Jira Service Management | ServiceNow | Confluence

Cloud & Data: AWS Infrastructure | Databricks | SQL | API Troubleshooting | Log Analysis

Domains: KYC/AML Workflows | AI-assisted Triage | Workflow Automation

CAREER HISTORY

Setanta Sports | Application Support Manager

Jan 2025 – Present

Georgia's leading sports streaming and B2B betting platform; operator-side technical operations across live sports and casino verticals.

- Built the Application Support function from zero. Recruited a 10-person Tier 2 team and defined escalation frameworks.
- Cut escalation rate from 65% to 3% within 12 months by restructuring triage logic and L1-to-L2 handoff protocols.
- Held 99.98% SLA adherence with 1-minute average MTTA against a 5-minute target across peak streaming and betting events.
- Shipped AI-assisted triage in Jira Service Management for application support cases. Cut MTTR 22% with no headcount increase.
- Designed and shipped a Jira-integrated bonus engine for the Aviator B2B operator team serving 411k daily users, automating dispute and reconciliation workflows.
- Ran root cause investigations across AWS monitoring and log analysis. Partnered with Engineering on permanent fixes for recurring incident patterns.

Webiz International | Operations Center → Operational Excellence Manager

Oct 2023 – Jan 2026

Georgia-based outsourcing partner running eToro's 24/7 FinTech operational infrastructure across US, European, and Asian trading markets. Promoted to Operational Excellence Manager in October 2024.

- Cut MTTA 93% (17.3 to 1.2 minutes) and lifted First Line Resolution from 80% to 98% across 2,000+ monthly tickets and ~2,000 monthly monitoring alerts.
- Scaled the 24/7 operations organization to 30 FTE across NOC, SOC, and Professional Services, structured under three team leads each owning a function with clear escalation layers.
- Improved P0-P2 proactive detection from 1-in-6 to 10-in-12 events across ~30 monthly high-severity incidents, shifting incident response from reactive to predictive.
- Founded and ran Georgia's first SOC bootcamp. Converted cohort graduates into full-time eToro security operations hires.
- Shipped AI-assisted ticket routing and automated categorization. Cut manual triage workload 60%.
- Built escalation frameworks and staffing models sustaining 99.95%+ SLA adherence across eToro's global 24/7 trading platform spanning US, European, and Asian regulatory regimes.

Evolution (iGaming) | Service Support Specialist → Team Lead

Dec 2019 – Oct 2023

Live-casino iGaming provider operating across multiple licensed jurisdictions. Promoted to Team Lead within two years.

- Led a 12-person support team across four global locations covering shift planning, quality calibration, and performance coaching.
- Owned Tier 1 and Tier 2 escalations including VIP and regulator-sensitive incidents across multiple licensed jurisdictions.
- Built structured mentorship and QA programs that lifted first-level resolution rates 30% across the 66-person support organization.
- Standardized 45+ operational workflows in Confluence. Cut onboarding time 25% and average ticket workload 40%.

INDEPENDENT PROJECTS

Opsrift | Founder | opsrift.com

Incident management SaaS for engineering teams covering postmortems, runbooks, status pages, and AI-driven incident assistance.

- Shipped 6 tools and 9 integrations including PagerDuty, OpsGenie, Datadog, Grafana, Jira, Confluence, Slack, GitHub, and Microsoft Teams.
- Built on React, TypeScript, Express, Anthropic Claude API, Clerk, Supabase, and Paddle.

Akamaru | Founder | akamaru.dev

SaaS boilerplate with AI setup coach and a single-JSON brand-rebrand engine that swaps strings, colors, legal pages, and email templates in roughly 5 minutes. Clone-to-launch in under 45 minutes.

- Stack: React 19, Vite, Express, Postgres, Drizzle, Clerk, Paddle, Resend, Tailwind v4.

Career Co-Pilot | Personal project

Telegram-based career operations bot combining job scraping, role-tailored CV generation, and inbound digest delivery.

- Scrapes Greenhouse, Lever, and Ashby ATS APIs across 43+ companies on a cron schedule. Generates role-tailored A4 PDFs via /cv [role] slash commands using the Anthropic API and WeasyPrint.
- Splits inbound into operations and commercial digests via a custom classifier with Telegram alerts on qualified matches.
